Subject: Ammonia Criteria Implementation Workshop

Tom, Laura -

NACWA, together with WEF, WERF and the state water regulators (ACWA) are convening a workshop on October 29 and 30 here in DC (actually at EPA's Potomac Yard North Building) to discuss some of the implementation challenges associated with the new ammonia criteria. The folks in OST are helping by providing the meeting space and getting the right EPA people in the room. Participation from OWM is very important to us and OST suggested we reach out to both of you.

Our objective is to get wastewater, state, and EPA representatives in a room to discuss the implementation challenges, where additional guidance/tools may be needed, and whether we can agree on some common framework for implementation that would ease the burden on the states and municipalities. NACWA, WEF, WERF and ACWA are working to set the agenda with the help of the Great Lakes Environmental Center (acting as a contractor). I have attached a preliminary agenda and would welcome any thoughts/comments you may have.

Please let me know what you think at your earliest convenience. We think your participation is critical to the success of the workshop.

Thanks, Chris

Chris Hornback | Senior Director, Regulatory Affairs | National Association of Clean Water Agencies (NACWA) (O) 202/833-9106 | (M) 703/798-5714 | chornback@nacwa.org
